# Calculator and Quick Reference Guide: Liquidity (Current or Working Capital Ratio)

Please use the following calculator and quick reference guide to assist you in evaluating liquidity from business returns. It provides suggested guidance only and does not replace Lender, Investor or GSE instructions or applicable guidelines. Please note all lines referenced below are from the applicable business return’s Schedule L. If a Partnership did not complete a Schedule L (check Form 1065, Schedule B, Question 4 to verify one was not required), you cannot calculate liquidity from the tax form.

Liquidity (Current or Working Capital Ratio)		2022	2021
1	Cash (P/Tship, S–C and Corp: Line 1d)		
2	Tradenotes/Accounts Receivable Without Bad Debt (P/Tship, S–C and Corp: Line 2b[d])		
3	Inventories (Line 3)		
4	US Government Obligations and/or Tax-Exempt Securities (Lines 4 and 5)*		
5	Other Current Assets (Other Marketable Securities; P/Tship, S–C and Corp: Line 6d)*		
6	Accounts Payable (P/Tship: Line 15d, S–C or Corp: Line 16d)		
7	Mortgages, Notes or Bonds Payable in Less Than 1 Year (P/Tship: Line 16d, S–C or Corp: Line 17d)		
8	Other Current Liabilities (P/Tship: Line 17d, S–C or Corp: Line 18d)		
Current Ratio A result of one or greater is generally sufficient to confirm adequate business liquidity to support the withdrawal of earnings.			

\*Check your lender/investor policy on whether to include Government Obligations, Tax-Exempt Securities and/or Other Marketable Securities.

Click green buttons to calculate result.  
Please note: If Lines 6, 7 and 8 total zero, the calculator will show an error message, but the business is solvent.
